

This indispensable book provides therapists and counselors with crucial knowledge about psychotropic medications: when and how to make medication referrals, how to help patients handle questions and problems that arise, and how to combine medication and psychotherapy effectively. Ideal for readers without extensive background in neurobiology, the book clearly explains how medications work in the brain and how they affect an individual's emotions, behavior, and relationships. Particular attention is given to strategies for collaborating successfully with prescribers. The authors also emphasize the important role that family members play in medication decision making and discuss ways to involve them in treatment.

The Lost Frontier: Images and Narrative, Jenny Is Scared: When Sad Things Happen in the World, The Meanings Of Mass Higher Education (Society for Research Into Higher Education), Missionary Travels and Researches in South Africa; Including a Sketch of Sixteen Years Residence in the Interior of Africa, and a Journey from the CA, Carousel, O Pais do Carnaval / Cacau / Suor, Find It in Everything: Photographs by Drew Barrymore, Shadow Hills: No Valentine, El poder de tu historia (Spanish Edition), The Art of the Photograph: Essential Habits for Stronger Compositions,
